

# FT EUSTIS GARRISON LEAN SIX SIGMA FLASH UPDATE

**JULY 2009**

*Let Lean Six Sigma Work For You*

## Did you know?

The Garrison Lean Six Sigma poster was published in May. This is the first in a series of posters to educate the workforce on the LSS program.

## Training

Lean Six Sigma Awareness Training is scheduled for 22 July 2009 at the Ft Eustis Club.

## Coming Soon

IMCOM is developing a series of self paced continuing education classes to give Green Belts and Black Belts a deeper understanding of the various LSS tools.

## How LSS Is Working for Ft Eustis

### Black Belt News:

Now that **Wanda Raney** is a certified Green Belt, we are giving her another challenge. Wanda has been selected to continue with her Lean Six Sigma training and will be attending the Black Belt course in July.

### Green Belt News:

**Ken Kelley** from DPTMSEC has completed his Green Belt training and is moving along through his certification project to improve the process of publishing plans, such as the severe weather plan.

**Charlene Campbell** from PMO has completed her first week of Green Belt training. Charlene will be working a project to improve the traffic flow at the gates.

## Tools

IMCOM has developed a tool kit that has many of the functions Green Belts need to use in project execution. The tool kit is a plug-in for Excel 2007 and functions much the same as Minitab. See Ed Magary for help setting up and using this tool.

## Certifications

Congratulations to our new Garrison Belt. They have completed a process improvement project and obtained their certification.

**Wanda Rainey:** Certified Green Belt
